UMB-BIORESO Lunch & Learn - Choosing the Right Antibody for Imaging Success

Join us for a lunch & learn at UMB. The success of any immunoassay hinges on the quality of the antibody, yet improper selection is a leading cause of inconsistent data. This session offers practical guidance on identifying the most reliable reagents for detection of proteins via Immunohistochemistry.

Topics we will discuss to increase your experimental success rate include:

- Antibody validation for IHC
- Direct vs. Indirect Detection
- Single vs. Multi-Analyte Measurements
- New Technologies

Lunch will be provided. RSVP to reserve your seat, space is limited.
